Development In Modern Africa-Martin S. Shawpnyia 2019-10-08 Development in Modern Africa: Past and Present Perspectives contributes to our understanding of Africa's experiences with the development process. It deals with Africa's long history of economic dependency and the history of the critique of development in Africa that have yielded two general categories of analysis: skepticism and positivist. In order to develop a more optimistic view of Africa's development experiences, highlighting elements that can be lassoed to enhance the condition of African populations and their states. By using case studies from precolonial, colonial, and postcolonial Africa, contemporary Africa, and the African diaspora, this volume demonstrates that political, social, and cultural variables are universal. They are not limited to the Western world, which the term and process of development are typically associated with. Before and after contact with the West, Africans have actively created institutions and values that they have actively employed to improve individual and community lives. This innovative spirit has motivated Africans to integrate or experiment with new laws and structures, challenges, and solutions to human welfare, to interact and adapt in ways that would benefit the African community. Colonial Madness - Richard C. Keller 2008-09-15

Nineteenth-century French writers and travelers imagined Muslim colonies in North Africa to be realms of savage violence, lurid sexuality, and primitive madness. Colonial Madness traces the genealogy and development of this idea from the beginnings of colonial expansion to the present, revealing the ways in which psychiatry has been at once a weapon in the arsenal of colonial racism, an innovative branch of medical science, and a mechanism for negotiating the meaning of difference for republican citizenship. Drawing from extensive archival research and fieldwork in France and North Africa, Richard Keller offers much more than a history of colonial psychology. Colonial Madness explores the notion of what French thinkers saw as an inherent mental, intellectual, and behavioral rift marked by the Mediterranean, as well as the idea of the colonies as an experimental space freed from the limitations of metropolitan society and reason. These ideas have modern relevance, Keller argues, reflected in French thought about race and debates over immigration and France’s postcolonial legacy.
