Development and Social Change-Philip

McMichael 2016-01-25 In this new Sixth Edition of *Development and Social Change: A Global Perspective*, author Philip McMichael describes a world undergoing profound social, political, and economic transformations, from the post-World War II era through the present. He tells a story of development in four parts—colonialism, developmentalism, globalization, and sustainability—that shows how the global development “project” has taken different forms from one historical period to the next. Throughout the text, the underlying conceptual framework is that development is a political construct, created by dominant actors (states, multilateral institutions, corporations and economic coalitions) and based on unequal power arrangements. While rooted in ideas about progress and prosperity, development also produces crises that threaten the health and well-being of millions of people, and sparks organized resistance to its goals and policies. Frequent case studies make the intricacies of globalization concrete, meaningful, and clear. *Development and Social Change: A Global Perspective* challenges us to see ourselves as global citizens even as we are global consumers.

International Development Governance-

Ahmed Shafiqul Huque 2017-09-25 The establishment of good governance is a major challenge for the developing world, along with the need to sustain the progress resulting from developmental efforts. Although there are numerous studies on the development and governance of emerging nations, few volumes make a serious effort to bring together these two critical concepts. International Development Governance combines the two concepts - development and governance - by examining the issues and problems faced by nations in their attempts to establish sustainable governance. This textbook also initiates discussions on the concept of development governance in an international context. The book fills the gap in existing literature by drawing upon the experience and expertise of scholars from a broad spectrum of knowledge. Their views explain the issues and problems with reference to a number of tools that could establish "development governance" and sustain it. The text offers in-depth examinations of developmental sectors, resulting in a textbook that will inspire future public officials, policy makers, and consultants to contribute to the betterment of life for citizens of developing countries.

Tourism and Development in the Developing World-

David J. Telfer 2015-12-14 Tourism is widely considered to be an important factor in socio-economic development, particularly in less developed countries. However, despite almost universal recognition of tourism's development potential, the extent to which economic and social progress is linked to the growth of a country's tourism sector remains the subject of intense debate. Tourism and Development in the Developing World offers a thorough overview of the tourism-development relationship. Focusing specifically on the less developed world and drawing on contemporary case studies, this updated second edition questions widely-held assumptions on the role of tourism in development and seeks to highlight the challenges faced by destinations seeking to achieve development through tourism. The

introductory chapter establishes the foundation for the book, exploring the meaning and objectives of development, reviewing theoretical perspectives on the developmental process, and assessing the reasons why less developed countries are attracted to tourism as a development option. The concept of sustainable development, as the most widely adopted contemporary model of development, is then introduced and its links with tourism critically assessed. Subsequent chapters explore the key issues associated with tourism and development, including the rise of globalization; the tourism planning and development process; the relationship between tourism and communities within which it is developed; the management implications of trends in the demand for and uptake of tourism; and an analysis of the consequences of tourism development for destination environments, economies and societies. A new chapter considers the challenges of climate change, sustainability of resource supply (oil, water and food), global economic instability, political instability and changing demographics. Finally, the issues raised throughout the book are drawn together in a concluding chapter that assesses the tourism and development 'dilemma'. Combining an overview of essential concepts, theories and knowledge with an analysis of contemporary issues and debates in tourism and development, this new edition will be an invaluable resource for those investigating tourism issues in developing countries. The book will be of interest to students of tourism, development, geography and area studies, international relations and politics, and sociology.

Rethinking Multilateralism in Foreign Aid-

Viktor Jakupec 2020-04-23 This edited book provides a contemporary, critical and thought-provoking analysis of the internal and external threats to Western multilateral development finance in the twenty-first century. It draws on the expertise of scholars with a range of backgrounds providing a critical exploration of the neoliberal multilateral development aid. The contributions focus on how Western institutions have historically dominated development aid, and juxtapose this hegemony with the recent challenges from right-wing populist and the Beijing Consensus ideologies and practices. This book argues that the rise of right-wing populism has brought internal challenges to traditional powers within the multilateral development system. External challenges arise from the influence of China and regional development banks by providing alternatives to established Western dominated aid sources and architecture. From this vantagepoint, Rethinking Multilateralism in Foreign Aid puts forward new ideas for addressing the current global social, political and economic challenges concerning multilateral development aid. This book will be of interest to researchers, academics and students in the field of International Development and Global Governance, decision-makers at government level as well as to those working in

international aid institutions, regional and bilateral aid agencies, and non-governmental organisations.
