Exploring Sociology-Bruce Ravelli 2012-06-27 Exploring Sociology is a "students first" resource written with millennial students in mind, and with their help. Bruce Ravelli and Michelle Webber, the authors of Exploring Sociology, believe that theory provides the foundation for sociology and that students need to explore both classical and modern theory to grasp the sociological endeavour fully. Accordingly, this text provides the most comprehensive overview of classical and modern social theories of any textbook. This is the first mainstream introductory sociology text to devote an entire chapter to contemporary theory, and the first to integrate postmodern and post-structural theoretical insights meaningfully throughout the book. The authors inspire students to think sociologically, to engage their sociological imaginations, and to foster an appreciation for how social factors such as income level, gender, and minority status influence who they are and the people they become. Through its distinctive approach to the field, its readability, and its relevance to Canadian students' lives, Exploring Sociology: A Canadian Perspective supports professors in developing their students' sociological imaginations and encouraging them to see sociology from multiple perspectives. Rarely does the student, the person who uses the textbook and technology, participate in the writing and development process. For the second edition of Exploring Sociology, students had an opportunity to offer feedback and to have 'their say'. Students offered their suggestions for improvement through anonymous online surveys, manuscript reviews, and in-class evaluations. The authors addressed students' comments with

respect to the presentation of theory and the pedagogical features. MySocLab is not included with the purchase of this product. Important Notice: The digital edition of this book is missing some of the images found in the physical edition.

Introduction to Sociology 2e-Heather Griffiths 2017-12-31 Introduction to Sociology 2e adheres to the scope and sequence of a typical, one-semester introductory sociology course. It offers comprehensive coverage of core concepts, foundational scholars, and emerging theories, which are supported by a wealth of engaging learning materials. The textbook presents detailed section reviews with rich questions, discussions that help students apply their knowledge, and features that draw learners into the discipline in meaningful ways. The second edition retains the book's conceptual organization, aligning to most courses, and has been significantly updated to reflect the latest research and provide examples most relevant to today's students. In order to help instructors transition to the revised version, the 2e changes are described within the preface. The images in this textbook are grayscale. Authors include: Heather Griffiths, Nathan Keirns, Eric Strayer, Susan Cody-Rydzewski, Gail Scaramuzzo, Tommy Sadler, Sally Vyain, Jeff Bry, Faye Jones

Sociology- 2012-04-05 Sociology: A Canadian Perspective, third edition, is a comprehensive and engaging introduction to sociology. Drawing on the many dimensions of social life, this text offers a detailed overview of social theory and Canadian society.

The Sociology of Early Childhood-Norman Gabriel 2017-02-20 The Sociology of Early Childhood is a theoretically and historically grounded examination of young children's experiences in contemporary society. Arguing that a sociology of early childhood must bring together and integrate different disciplines, this book: synthesises different sociological perspectives on childhood as well as incorporating multi-disciplinary research findings on the lives of young children explains key theoretical concepts in early childhood studies such as investment, early intervention, professional power and discourse examines the importance of play, memory and place evaluates long term parenting trends uses illustrative examples and case studies, discussion questions and annotated further reading to engage and stimulate readers. Invigorating and thought provoking, this is an invaluable read for advanced undergraduates and postgraduate students looking for a more nuanced and progressive understanding of childhood.

Finding Feminism-Alison Dahl Crossley 2017-04-25 The contemporary tactics of millennial feminists who are part of an active movement for social change. In 2014, after a young man murdered six students at the University of California, Santa Barbara, and then killed himself, the news provoked an eye-opening surge of feminist activism. Fueled by the wide circulation of the killer's hateful manifesto and his desire to exact "revenge" upon young women, feminists online and offline around the world clamored for a halt to such acts of misogyny. Despite the widespread belief that feminism is out-of-style or dead, this mobilization of young women fighting against gender oppression was overwhelming. In Finding Feminism, Alison Dahl Crossley analyzes feminist activists at three different U.S. colleges, revealing that feminism is alive on campuses, but is complex, nuanced, and context-dependent. Young feminists are carrying the torch of the movement, despite a climate that is not always receptive to their claims. These feminists are engaged in social justice organizing in unexpected contexts and spaces, such as multicultural sororities, student government, and online. Sharing personal stories of their everyday experiences with inequality, the young women in Finding Feminism employ both traditional and innovative feminist tactics. They use the Internet and social media as a tool for their activism—what Alison Dahl Crossley calls

'Facebook Feminism.' The university, as an institution, simultaneously aids and constrains their fight for gender equality. Offering a stunning and hopeful portrait of today's young feminist leaders, Finding Feminism provides insight into the contemporary feminist movement in America.

To Fix Or To Heal-Ana Marta Gonzalez 2016-02-26 Do doctors fix patients? Or do they heal them? For all of modern medicine's many successes, discontent with the quality of patient care has combined with a host of new developments, from aging populations to the resurgence of infectious diseases, which challenge medicine's overreliance on narrowly mechanistic and technical methods of explanation and intervention, or "fixing" patients. The need for a better balance, for more humane "healing" rationales and practices that attend to the social and environmental aspects of health and illness and the experiencing person, is more urgent than ever. Yet, in public health and bioethics, the fields best positioned to offer countervailing values and orientations, the dominant approaches largely extend and reinforce the reductionism and individualism of biomedicine. The collected essays in To Fix or To Heal do more than document the persistence of reductionist approaches and the attendant extension of medicalization to more and more aspects of our lives. The contributors also shed valuable light on why reductionism has persisted and why more holistic models, incorporating social and environmental factors, have gained so little traction. The contributors examine the moral appeal of reductionism, the larger rationalist dream of technological mastery, the growing valuation of health, and the enshrining of individual responsibility as the seemingly non-coercive means of intervention and control. This paradigm-challenging volume advances new lines of criticism of our dominant medical regime, even while proposing ways of bringing medical practice, bioethics, and public health more closely into line with their original goals. Precisely because of the centrality of the biomedical approach to our society, the contributors argue, challenging the reductionist model and its ever-widening effects is perhaps the best way to press for a much-needed renewal of our ethical and political discourse.

innovative and accessible guide to doing social research in the digital age The rapid spread of social media, smartphones, and other digital wonders enables us to collect and process data about human behavior on a scale never before imaginable, offering entirely new approaches to core questions about social behavior. Bit by Bit is the key to unlocking these powerful methods. In this authoritative and accessible book, Matthew Salganik explains how the digital revolution is transforming the way social scientists observe behavior, ask questions, run experiments, and engage in mass collaborations. Featuring a wealth of real-world examples and invaluable advice on how to tackle the thorniest ethical challenges, Bit by Bit is the essential guide to doing social research in this fast-evolving digital age.

The Anthem Companion to Everett Hughes- Rick Helmes-Hayes 2016-12-01 The Anthem Companion to Everett Hughes is a comprehensive and updated critical discussion of Hughes's contribution to sociology and his current legacy in the social sciences. A global team of scholars discusses issues such as the international circulation of Hughes's work, his intellectual biography, his impact on current ethnographic research practices and the use in current research of such Hughesian concepts as master status, dirty work and bastard institutions. This companion is a useful reference for students of classical sociology, practitioners of ethnographic research and scholars of sociology in the Chicagoan tradition.

Handbook of the Sociology of Medical Education-Caragh Brosnan 2009-09-10 The Handbook of the Sociology of Medical Education provides a contemporary introduction to this classic area of sociology by examining the social origin and implications of the epistemological, organizational and demographic challenges facing medical education in the twenty-first century. Beginning with reflections on the historical and theoretical foundations of the sociology of medical education, the collection then focuses on current issues affecting medical students, the profession and the faculty, before exploring medical education in different national contexts. Leading sociologists analyze: the intersection of medical education and social structures such as gender, ethnicity and disability; the effect of changes in medical

practice, such as the emergence of evidence-based medicine, on medical education; and the ongoing debates surrounding the form and content of medical curricula. By examining applied problems within a framework which draws from social theorists such as Pierre Bourdieu, this new collection suggests future directions for the sociological study of medical education and for medical education itself.

Exploring Sociology-Bruce Ravelli 2014-01-06 Think like a sociologist! Exploring Sociology: The Concise Edition is truly a "students-first" resource. Written with students in mind, Authors Bruce Ravelli and Michelle Webber inspire students to think sociologically and to engage their sociological imaginations to foster an appreciation for how social factors such as income level, gender, and minority status influence who they are and the people they become. Through its distinctive approach to the field, its readability, and its relevance to students' lives, Exploring Sociology: The Concise Edition helps professors to develop the sociological imagination in their students by encouraging them to see sociology from multiple perspectives.

Sisters or Strangers?-Marlene Epp 2016 Spanning more than two hundred years of history, from the eighteenth century to the twenty-first, Sisters or Strangers? explores the complex lives of immigrant, ethnic, and racialized women in Canada. Among the themes examined in this new edition are the intersection of race, crime, and justice, the creation of white settler societies, letters and oral histories, domestic labour, the body, political activism, food studies, gender and ethnic identity, and trauma, violence, and memory. The second edition of this influential essay collection expands its chronological and conceptual scope with fifteen new essays that reflect the latest cutting-edge research in Canadian women's history. Introductions to each thematic section include discussion questions and suggestions for further reading, making the book an even more valuable classroom resource than before.

Exploring Religion and Diversity in Canada- Catherine Holtmann 2018-06-25 This book is intended for advanced undergraduate and graduate students interested in learning about

the many ways in which religious diversity is manifest in day-to-day life Canada. Each chapter addresses the challenges and opportunities associated with religious diversity in a different realm of social life from families to churches, from education to health care, and from Muslims to atheists. The contributors present key concepts, relevant statistical data and real-life stories from qualitative data. The content of the book is supplemented by links to online learning resources including videos, websites and photo essays.

Death Makes the News-Jessica M. Fishman
2017-11-21 Winner of the 2018 Media Ecology Association's Erving Goffman Award for Outstanding Scholarship in the Ecology of Social Interaction Winner of the Eastern Communication Association's Everett Lee Hunt Award A behind-the-scenes account of how death is presented in the media Death is considered one of the most newsworthy events, but words do not tell the whole story. Pictures are also at the epicenter of journalism, and when photographers and editors illustrate fatalities, it often raises questions about how they distinguish between a "fit" and "unfit" image of death. *Death Makes the News* is the story of this controversial news practice: picturing the dead. Jessica Fishman uncovers the surprising editorial and political forces that structure how the news and media cover death. The patterns are striking, overturning long-held assumptions about which deaths are newsworthy and raising fundamental questions about the role that news images play in our society. In a look behind the curtain of newsrooms, Fishman observes editors and photojournalists from different types of organizations as they deliberate over which images of death make the cut, and why. She also investigates over 30 years of photojournalism in the tabloid and patrician press to establish when the dead are shown and whose dead body is most newsworthy, illustrating her findings with high-profile news events, including recent plane crashes, earthquakes, hurricanes, homicides, political unrest, and war-time attacks. *Death Makes the News* reveals that much of what we think we know about the news is wrong: while the patrician press claims that they do not show dead bodies, they are actually more likely than the tabloid press to show them—even though the tabloids actually claim to have no qualms showing these bodies. Dead foreigners are more likely to be shown than American bodies. At the

same time, there are other unexpected but vivid patterns that offer insight into persistent editorial forces that routinely structure news coverage of death. An original view on the depiction of dead bodies in the media, *Death Makes the News* opens up new ways of thinking about how death is portrayed.

For Durkheim-Edward A. Tiryakian 2016-12-05
For Durkheim is a timely and original contribution to the debate about Durkheim at a time when his concerns on ethics, morality and civil religion have much relevance for our own troubled and divided society. It includes two new essays from Edward A. Tiryakian's collection on the Danish Muhammad cartoons and September 11th, providing contemporary relevance to the debate and an analytical and interpretive introduction indicating the ongoing importance of Durkheim within sociology. This indispensable volume for all serious Durkheim scholars includes English translations of papers previously published in French for the first time, and will be of interest to sociologists, anthropologists, social historians and those interested in critical questions of modernity.

Seeking Talent for Creative Cities-Jill Grant
2014-02-05 With the growth of knowledge-based economies, cities across the globe must compete to attract and retain the most talented workers. *Seeking Talent for Creative Cities* offers a comprehensive and insightful analysis of the diverse, dynamic factors that affect cities' ability to achieve this goal. Based on a comparative national study of 16 Canadian cities, this volume systematically evaluates the concerns facing workers operating in a range of creative endeavours. It draws on interviews, surveys, and census data collected over a six-year research program conducted by experts in business, public policy, urban studies, and communications studies to identify the characteristics and features of particular city-regions that influence these workers' mobility and satisfaction. *Seeking Talent for Creative Cities* represents a rigorously empirical test of popular wisdom on the true relationship between urban development and economic competitiveness.

Indigenous Data Sovereignty and Policy-Maggie Walter 2020-10-29 This book examines how Indigenous Peoples around the world are demanding greater data sovereignty, and challenging the ways in which governments have historically used Indigenous data to develop policies and programs. In the digital age, governments are increasingly dependent on data and data analytics to inform their policies and decision-making. However, Indigenous Peoples have often been the unwilling targets of policy interventions and have had little say over the collection, use and application of data about them, their lands and cultures. At the heart of Indigenous Peoples' demands for change are the enduring aspirations of self-determination over their institutions, resources, knowledge and information systems. With contributors from Australia, Aotearoa New Zealand, North and South America and Europe, this book offers a rich account of the potential for Indigenous data sovereignty to support human flourishing and to protect against the ever-growing threats of data-related risks and harms.

Social Reproduction-Meg Luxton 2006-10-02 Using a feminist political economy approach, contributors document the impact of current socio-economic policies on states, markets, households, and communities. Relying on impressive empirical research, they argue that women bear the costs of and responsibility for care-giving and show that the theoretical framework provided by feminist analyses of social reproduction not only corrects the gender-blindness of most economic theories but suggests an alternative that places care-giving at its centre. In this illuminating study, they challenge feminist scholars to re-engage with materialism and political economy to engage with feminism.

Razing Africville-Jennifer Nelson 2009-05-16 In the 1960s, the city of Halifax razed the black community of Africville under a program of urban renewal and 'slum clearance.' The city defended its actions by citing the deplorable living conditions in Africville, ignoring its own role in the creation of these conditions through years of neglect and the refusal of essential services. In the 1980s, the city created a park on Africville's former site, which has been a place of protest and commemoration for black citizens since its opening. As yet, however, the city has not issued a formal apology to Africville residents and has paid no further compensation. *Razing Africville* examines this history as the prolonged eviction of a community from its own space. By examining a variety of sources - urban planning texts, city council documents, news media, and academic accounts - Jennifer J. Nelson illustrates how Africville went from a slum to a problem to be solved and, more recently, to a public space in which past violence is rendered invisible. Reading historical texts as a critical map of decision-making, she argues that the ongoing measures taken to regulate black bodies and spaces amount to a 'geography of racism.' Through a geographic lens, therefore, she manages to analyse ways in which race requires space and how the control of space is a necessary component of delineating and controlling people. A much needed re-examination of an important historical example, *Razing Africville* applies contemporary spatial theory to the situation in Africville and offers critical observations about the function of racism.

Challenging Frontiers-Lorry W. Felske 2004 "Challenging Frontiers: The Canadian West" is a multidisciplinary study using critical essays as well as creative writing to explore the conceptions of the "West," both past and present. Considering topics such as ranching, immigration, art and architecture, as well as globalization and the spread of technology, these articles inform the reader of the historical frontier and its mythology, while also challenging and reassessing conventional analysis.

Chasing Rainbows: Exploring Gender Fluid Parenting Practices-Fiona Joy Green 2013-09-01 Feminist parenting creates unique challenges. As women experience the unique powerlessness of motherhood, they also hold the

uncomfortable power of acting as advocates for and as agents of socialization and social control over their children. Fathers may feel the desire for feminist parenting whilst experiencing a backlash and a lack of support, while some parents may attempt to resist the binaries of mothering and fathering in their feminist parenting journey. Feminist parents may attempt to resist gender binaries; they may submit to them while attempting to foster critical dialogue; they may struggle with the display of their own femininity and masculinity or, for some, its perceived lack. This book attempts to cast a lens on the messy and convoluted ways that feminist parents approach parenting their children in gender aware and gender fluid ways.

Critical Intersex-Morgan Holmes 2016-04-22 To date, intersex studies has not received the scholarly attention it deserves as research in this area has been centred around certain key questions, scholars and geographical regions. Exploring previously neglected territories, this book broadens the scope of intersex studies, whilst adopting perspectives that turn the gaze of the liberal, humanist, scientific outlook upon itself, in order to reconfigure debates about rights, autonomy and subjectivity, and challenges the accepted paradigms of intersex identity politics. Presenting the latest theoretical and empirical research from an international group of experts, this is a truly interdisciplinary volume containing critical approaches from both the humanities and social sciences. With its contributions to sociology, anthropology, medicine, law, history, cultural studies, psychology and psychoanalysis, *Critical Intersex* will appeal to scholars and clinical practitioners alike.

Canadian Society in the Twenty-first Century-Trevor W. Harrison 2010 Now in its second edition, *Canadian Society in the 21st Century: A Historical Sociological Approach* opens up an engaging and much-needed overview of our society, at a level appropriate for a wide range of courses in Canadian Studies, Sociology, and History. This original work examines the growth and development of Canadian society within a socio-historical framework. The authors investigate historical, economic, political, cultural, and ideological perspectives through three key relationships: Quebec and Canada, Canada and the United

States, and Canada and the Aboriginal Nations. Examines society as a set of relationships that emerge gradually over time as fostered, encouraged, and mediated by a set of institutions, in particular, the state and markets. Explores society as the product of an historical narrative - a movie, rather than a snapshot - which enlists many literary devices, including myths, metaphors, symbols, heroes, villains, and tragic figures. Identifies the complex relationship between individuals and society. Students are asked to consider to what extent individuals create society, and conversely, to what extent society creates individuals.

Lifestyle in Siberia and the Russian North-Joachim Otto Habeck 2019-11-25 *Lifestyle in Siberia and the Russian North* breaks new ground by exploring the concept of lifestyle from a distinctly anthropological perspective. Showcasing the collective work of ten experienced scholars in the field, the book goes beyond concepts of tradition that have often been the focus of previous research, to explain how political, economic and technological changes in Russia have created a wide range of new possibilities and constraints in the pursuit of different ways of life. Each contribution is drawn from meticulous first-hand field research, and the authors engage with theoretical questions such as whether and how the concept of lifestyle can be extended beyond its conventionally urban, Euro-American context and employed in a markedly different setting. *Lifestyle in Siberia and the Russian North* builds on the contributors' clear commitment to diversifying the field and providing a novel and intimate insight into this vast and dynamic region. This book provides inspiring reading for students and teachers of Anthropology, Sociology and Cultural Studies and for anyone interested in Russia and its regions. By providing ethnographic case studies, it is also a useful basis for teaching anthropological methods and concepts, both at graduate and undergraduate level. Rigorous and innovative, it marks an important contribution to the study of Siberia and the Russian North.

In the Realm of Hungry Ghosts-Gabor Maté, MD 2011-06-28 From bestselling author Gabor Maté, the essential resource for understanding the roots and behaviors of addiction--now with an added introduction by the author. Based on Gabor Maté's two decades of experience as a

medical doctor and his groundbreaking work with the severely addicted on Vancouver's skid row, *In the Realm of Hungry Ghosts* radically reenvision this much misunderstood field by taking a holistic approach. Dr. Maté presents addiction not as a discrete phenomenon confined to an unfortunate or weak-willed few, but as a continuum that runs throughout (and perhaps underpins) our society; not a medical "condition" distinct from the lives it affects, rather the result of a complex interplay among personal history, emotional, and neurological development, brain chemistry, and the drugs (and behaviors) of addiction. Simplifying a wide array of brain and addiction research findings from around the globe, the book avoids glib self-help remedies, instead promoting a thorough and compassionate self-understanding as the first key to healing and wellness. *In the Realm of Hungry Ghosts* argues persuasively against contemporary health, social, and criminal justice policies toward addiction and those impacted by it. The mix of personal stories—including the author's candid discussion of his own "high-status" addictive tendencies—and science with positive solutions makes the book equally useful for lay readers and professionals.

Reading Beyond the Book-Danielle Fuller 2013-04-02 Literary culture has become a form of popular culture over the last fifteen years thanks to the success of televised book clubs, film adaptations, big-box book stores, online bookselling, and face-to-face and online book groups. This volume offers the first critical analysis of mass reading events and the contemporary meanings of reading in the UK, USA, and Canada based on original interviews and surveys with readers and event organizers. The resurgence of book groups has inspired new cultural formations of what the authors call "shared reading." They interrogate the enduring attraction of an old technology for readers, community organizers, and government agencies, exploring the social practices inspired by the sharing of books in public spaces and revealing the complex ideological investments made by readers, cultural workers, institutions, and the mass media in the meanings of reading.

Bruno Latour-Gerard de Vries 2018-02-12 Bruno Latour is among the most important figures in contemporary philosophy and social science. His ethnographic studies have

revolutionized our understanding of areas as diverse as science, law, politics and religion. To facilitate a more realistic understanding of the world, Latour has introduced a radically fresh philosophical terminology and a new approach to social science, 'Actor-Network Theory'. In seminal works such as *Laboratory Life*, *We Have Never Been Modern* and *An Inquiry into Modes of Existence*, Latour has outlined an alternative to the foundational categories of 'modern' western thought & particularly its distinction between society and nature & that has major consequences for our understanding of the ecological crisis and of the role of science in democratic societies. Latour's 'empirical philosophy' has evolved considerably over the past four decades. In this lucid and compelling book, Gerard de Vries provides one of the first overviews of Latour's work. He guides readers through Latour's main publications, from his early ethnographies to his more recent philosophical works, showing with considerable skill how Latour's ideas have developed. This book will be of great value to students and scholars attempting to come to terms with the immense challenge posed by Latour's thought. It will be of interest to those studying philosophy, anthropology, sociology, science and technology studies, and almost all other branches of the social sciences and humanities.

Spirituality and Social Work-Professor Beth R Crisp 2012-12-28 For much of the twentieth century, professional social work sought to distance itself from its religious origins with the consequence being that the role of spirituality in the lives of service users tended to be sidelined. Yet it is clear that many people begin to explore their spirituality precisely at times when they are trying to make sense of difficult life circumstances or experiences and may come into contact with social workers. In recent years, there has been an increasing understanding that in order to be relevant to the lives of people they work with, social workers need to go beyond their material needs, but there is little understanding of how spirituality can be sensitively incorporated into practice, especially when either practitioners or service users have no religious affiliation or there is no shared religious background. In this pathbreaking volume Beth Crisp offers social workers ideas of beginning conversations in which spiritual values and beliefs may surface, allowing service users to respond from their own framework and to begin

to discuss the specific religious or spiritual practices and beliefs which are important to them. She considers spirituality in the context of lived experience, a perspective that she argues breaks down any mystique and suspicion of explicitly religious language by focusing on language and experiences with which most people can identify. Such a framework allows exploration of issues that emerge at different stages in the lifespan, both by persons who are religious and those who do not identify with any formal religion. Most literature on spirituality within social work refers to the elderly, to those who are sick or have been bereaved, yet, as Crisp points out, spirituality is important for people of all ages and not just at seemingly exceptional moments.

Visual Sociology-Douglas Harper 2012 Visual sociology has been part of the sociological vocabulary since the 1970s, but until now there has not been a comprehensive text that introduces this area. Written by one of the founding fathers in the field, Visual Sociology explores how the world that is seen, photographed, drawn, or otherwise represented visually is different from the world that is represented through words and numbers. Doug Harper's exceptional photography and engaging, lively writing style will introduce: visual sociology as embodied observation visual sociology as semiotics visual sociology as an approach to data: empirical, narrative, phenomenological and reflexive visual sociology as an aspect of photo documentary visual sociology and multimedia. This definitive textbook is made up of eleven chapters on the key topics in visual sociology. With teaching and learning guidance, as well as clear, accessible explanations of current thinking in the field, this book will be an invaluable resource to all those with an interest in visual sociology, research methods, cultural geography, cultural theory or visual anthropology.

Employment Equity in Canada-Carol Agócs 2014 In the mid-1980s, the Abella Commission on Equality in Employment and the federal Employment Equity Act made Canada a policy leader in addressing systemic discrimination in the workplace. More than twenty-five years later, Employment Equity in Canada assembles a distinguished group of experts to examine the state of employment equity in Canada today.

Examining the evidence of nearly thirty years, the contributors - both scholars and practitioners of employment policy - evaluate the history and influence of the Abella Report, the impact of Canada's employment equity legislation on equality in the workplace, and the future of substantive equality in an environment where the Canadian government is increasingly hostile to intervention in the workplace. They compare Canada's legal and policy choices to those of the United States and to the UN Convention on the Rights of Persons with Disabilities, and examine ways in which the concept of employment equity might be expanded to embrace other vulnerable communities. Their observations will be essential reading for those seeking to understand the past, present, and future of Canadian employment and equity policy.

Developing Research Questions-Patrick White 2008-11-24 Undertaking a research project is a crucial, but often overwhelming aspect of any social sciences degree, and selecting a research question can be one of the toughest parts of the process. What makes an appropriate topic for research? How do you transform an idea into a 'researchable' question? And, once you've got a question, where do you go from there? Developing Research Questions steers readers through the complex process of starting a research project. The book explains how to break down initial ideas from broad topics into appropriate research questions, and gives detailed guidance on how to refine questions as the research project develops. Each chapter is packed with handy hints, tips and examples that show how to avoid common mistakes and pitfalls in the research process. Linking hypotheses and questions with research design and methods at every step, this text takes readers from the start through to the final stage of answering their questions and drawing conclusions. This is a no-fuss, practical guide to forming your own research question. It is an indispensable resource for social scientists carrying out research projects at all levels.

Nuclear Rites-Hugh Gusterson 1996 "An extremely important work. . . . It demonstrates the power that ethnographic analysis can have when directed at an examination of our own society's central nervous system."—Faye Ginsburg, author of *Contested Lives* "Essential reading for anyone trying to understand what

Cold War science was in all its cultural aspects and what this same science now in transformation might yet be."—George E. Marcus, co-editor of *The Traffic in Culture*

Discover Sociology—William J. Chambliss
2018-11-19 The authors are proud sponsors of the 2020 SAGE Keith Roberts Teaching Innovations Award—enabling graduate students and early career faculty to attend the annual ASA pre-conference teaching and learning workshop. What key social forces construct and transform our lives as individuals and as members of society? How does our social world shape us? How do we shape our world? Discover Sociology presents sociology as a discipline of curious minds. The authors inspire curiosity about the social world and empower students by providing the theoretical, conceptual, and empirical tools they need to understand, analyze, and even change the world in which they live. Organized around four main themes—The Sociological Imagination, Power and Inequality, Technological Transformations of Society, and Globalization—the book illuminates the social roots of diverse phenomena and institutions, ranging from poverty and deviance to capitalism and the nuclear family. "Behind the Numbers" features illustrate the practical side of sociology and shows students how to be critical consumers of social science data reported in the media. And every chapter addresses the question, "What can I do with a sociology degree?" by linking the knowledge and skills acquired through studying sociology with specific jobs and career paths. Hiding in Plain Sight—Wendy Chan 2020-04 Based on interviews with service providers from the immigration, criminal justice and family justice systems in four different communities in BC, *Hiding in Plain Sight* examines the barriers encountered by abused immigrant women across Canada.

Restoring Justice—Daniel W. Van Ness 2014-02-01 *Restoring Justice: An Introduction to Restorative Justice* offers a clear and convincing explanation of restorative justice, a movement within criminal justice with growing worldwide influence. It explores the broad appeal of this new vision and offers a brief history of its development. The book presents a theoretical foundation for the principles and values of restorative justice and develops its four cornerpost ideas of encounter, amends, inclusion and reintegration. After exploring how restorative justice ideas and values may be integrated into policy and practice, it presents a series of key issues commonly raised about restorative justice, summarizing various perspectives on each.

Ingrid Muenstermann 2017-02-15 The UNHCR assures us that never before have there been so many people on the move at the same time, mainly because of war-inflicted circumstances. Authors from different reputed institutions share their knowledge on this open-access platform to disseminate their knowledge at the global level. This book captures issues involved in meeting the challenges of people's movements in the twenty-first century. It explores attitudes of previously colonized people in a post-colonial period, analyses food insecurity in Canada, quality of life of elderly Turkish and Polish migrants in Germany, suicidal behaviours of immigrants admitted to an Italian-teaching hospital, and migration from a public healthcare perspective and points to the problem of tuberculosis among immigrants. Challenges of a more personal nature relate to second-language learning and acculturation of Brazilian migrants in Portugal and Asians as model minorities. Empirical evidence of why immigrants leave Norway is provided, and there is a discussion on the new actors of international migration (foreign students). This book closes with the voices of trailing women when it comes to the decision to emigrate. The collective contributions from experts attempt to provide updates regarding ongoing research and developments pertaining to migration.

Women and Religion in the West-Sonya

Sharma 2016-02-11 What is the relationship between women and secularization? In the West, women are abandoning traditional religion. Yet they continue to make up the majority of religious adherents. Accounting for this seeming paradox is the focus of this volume. If women undergird the foundations of religion but are leaving in large numbers, why are they leaving? Where are they going? What are they doing? And what's happening to those who remain? *Women and Religion in the West* addresses a neglected yet crucial issue within the debate on religious belonging and departure: the role of women in and out of religion and spirituality. Beginning with an analysis of the relationship between gender and secularization, the book moves its focus to in-depth examination of women's experiences based on data from key recent qualitative work on women and religion. This volume addresses not only women's place in and out of Christianity (the normal focus of secularization theories) but also alternative spiritualities and Islam, asking how questions of secularization differ between faith systems. This book offers students and scholars of religion, sociology, and women's studies, as well as interested general readers, an accessible work on the religiosity of western women and contributes fresh analyses of the rapidly shifting terrain of contemporary religion and spirituality.
