The Genie is Out of the Bottle-Larry Nichols 1999

The Genie Out of the Bottle-Morris Albert Adelman 1995 Choice Outstanding Academic Title, 1996. Pictures of oil as the glittering prize, the source of global power and empires, or the hub of an energy crisis have gushed through the media since 1973. What actually happened was very different. M. A. Adelman had written in 1970 that "the genie is out of the bottle," that a group of oil producing countries would control the oil trade to raise prices. Now, twenty-five years later, he has written the fascinating history of the greatest monopoly ever known. The underlying economic analysis is contained in the companion volume The Economics of Petroleum Supply. Oil was in oversupply in 1970. The oil companies could not keep prices from falling. But the members of OPEC (Organization of Petroleum Exporting Countries) could and did raise prices by restraining output. However, they first had to restrain each other: an endless task, since each of them would gain by cheating on the others. With open and secret agreements, formal and informal, they "tried to fine-tune with coarse instruments," resulting in the so-called energy crisis. Adelman describes the first timid steps to the "unbound cartel." He shows how the producing

nations overestimated their power, why they had short time horizons and raised the prices too high for their own good. But after prices declined, then crashed in 1986, the producing nations managed to hold a lower price level. Despite the trillions of petrodollars that fed two major wars, Adelman observes that nearly all OPEC nations are in debt. Non-OPEC production grows, but the cartel survives and the unstable market with it. Price hawks and doves may be good copy, Adelman notes, but in fact there was never an Arab "embargo" against the United States, nor any moderating influence by the United States. Since we must in our own interest protect the Persian Gulf producers, they understandably do nothing to oblige us.

Jeannie Out of the Bottle-Barbara Eden 2011-04-05 A magical, heartwarming memoir from one of Hollywood's most beloved actresses, best known for her iconic role on I Dream of Jeannie The landmark NBC hit television series I Dream of Jeannie has delighted generations of audiences and inspired untold numbers of teenage crushes on its beautiful blond star, Barbara Eden, for decades. Part pristine Hollywood princess and part classic bombshell, with innocence, strength, and comedic talent to spare, Barbara finally lets Jeannie out of her bottle to tell her whole story. Jeannie Out of the Bottle takes us behind the scenes of I Dream of Jeannie as well as Barbara's dozens of other stage, movie, television, and live concert performances. We follow her from the hungry years when she was a struggling studio contract player at 20th Century Fox through difficult weeks trying to survive as a chorus girl at Ciro's Sunset Strip supper club, from a stint as Johnny Carson's sidekick on live TV to tangling on-screen and off with some of Hollywood's most desirable leading men, including Elvis Presley, Clint Eastwood, Paul Newman, and Warren Beatty. From the ups and downs of her relationship with her Jeannie co-star Larry Hagman to a touching meeting with an exquisite and vulnerable Marilyn Monroe at the twilight of her career, readers join Barbara on a thrilling journey through her five decades in Hollywood. But Barbara's story is also an intimate and honest memoir of personal tragedy: a stillborn child with her first husband, Michael Ansara; a verbally abusive, drug-addicted second husband; the loss of her beloved mother; and the accidental heroin-induced death of her adult son, just months before his wedding. With candor and poignancy, Barbara reflects on the challenges she has faced, as well as the joys she has experienced and how she has maintained her humor, optimism, and inimitable Jeannie magic throughout the roller-coaster ride of a truly memorable life. Illustrated with sixteen pages of photographs, including

candid family pictures and rare publicity stills, Jeannie Out of the Bottle is a must-have for every fan, old and new.

The Genie Scheme-Kimberly K. Jones 2009-03-10 When Janna impulsively buys a winter hat for a bag lady, she expects nothing in return. But Janna's kindness pays off in a big way when the bag lady turns out to be a genie! Now Janna is the genie's master and she couldn't be happier, especially when she learns that the "three wishes" rule is strictly for fairy tales! Before long, Janna's room is overflowing with clothes and gadgets -- but things aren't quite as simple as they seem. Making wishes comes with its own set of rules, and Janna discovers that "unlimited" has some...well, limits. Genies can't make something out of nothing, so everything that Janna wishes for is taken from somebody else. Oops. And then there's the problem of genie wattage -- there's only so much of it, and Janna is using it up faster than she'd like. What's a greedy girl to do? With insight, warmth, and a refreshing dose of humor, Kimberly K. Jones puts a new twist on the old adage "Be careful what you wish for."

But when she discovers she's a celestial spirit who's powerful enough to bash through the gates of heaven with her fists, her perfectionist existence is shattered. Enter Quentin, a transfer student from China whose tone-deaf assertiveness beguiles Genie to the brink of madness. Quentin nurtures Genie's outrageous transformation—sometimes gently, sometimes aggressively—as her sleepy suburb in the Bay Area comes under siege from hell-spawn. This epic YA debut draws from Chinese folklore, features a larger-than-life heroine, and perfectly balances the realities of Genie's grounded high school life with the absurd supernatural world she finds herself commanding.

Living with the Genie-Alan Lightman 2013-03-05 "A group of remarkably

penetrating, frank, and expert scientists, techno-wizards, activists, and writers raise provocative questions about what is gained and what is lost in a world enthralled by technology in this wonderfully soulful forum on life in the 'Wired World.' " -BOOKLIST Biotechnology, Cloning, Robotics, Nanotechnology... At a time when scientific and technological breakthroughs keep our eyes focused on the latest software upgrades or the newest cell-phone wizardry, a group of today's most innovative thinkers are looking beyond the horizon to explore both the promise and the peril of our technological future. Human ingenuity has granted us a world of unprecedented personal power -- enabling us to communicate instantaneously with anyone anywhere on the globe, to transport ourselves in both real and virtual worlds to distant places with ease, to fill our bellies with engineered commodities once available to only a privileged elite. Through our technologies, we have sought to free ourselves from the shackles of nature and become its master. Yet science and technology continually transform our experience and society in ways that often seem to be beyond our control. Today, different areas of research and innovation are advancing synergistically, multiplying the rate and magnitude of technological and societal change, with consequences that no one can predict. Living with the Genie explores the origins, nature, and meaning of such change, and our capacity to govern it. As the power of technology continues to accelerate, who, this book asks, will be the master of whom? In Living with the Genie, leading writers and thinkers come together to confront this question from many perspectives, including: Richard Powers's whimsical investigation of the limits of artificial intelligence; Philip Kitcher's confrontation of the moral implications of science; Richard Rhodes's exploration of the role of technology in reducing violence; Shiv Visvanathan's analysis of technology's genocidal potential; Lori Andrews's insights into the quest for human genetic enhancement; Alan Lightman's reflections on how technology changes the experience of our humanness. These and ten other provocative essays open the door to a new dialogue on how, in the quest for human mastery, technology may be changing what it means to be human, in ways we scarcely comprehend.

Graveyard of Clerics-Pascal Menoret 2020 "Graveyard of Clerics is an ethnographic study of political action in Saudi Arabia. The book studies two phenomena that have rarely been analyzed together in the Middle East: urban sprawl and the politicization of religious activism. Suburbs emerged in Saudi Arabia after WWII, when the US oil company Aramco built racially segregated housing for its American employees and its Saudi, Arab, and Asian workforce. The country became an early non-western testing ground for urban growth techniques that, perfected in the United States before WWII, were widely exported during the Cold War: state guaranteed mortgages, standardized building and subdivision, and extensive freeway systems. Cheap gas, safe loans, and real estate speculation metamorphosed the Saudi landscape from the 1970s onward. Saudis started fleeing the inner cities, choked with car traffic and invaded by foreign migrants, to the peace and isolation of the suburbs. At the same time, autonomous religious movements emerged in the suburbs of Riyadh, Jeddah, Mecca, Medina, and Dammam between the late 1960s and the early 1980s. The Saudi Muslim Brotherhood, created by activists who had fled Egypt, Syria, and Iraq to avoid repression, developed within the cracks of the fledgling educational system. Various Salafi groups soon appeared in reaction to both the Muslim Brotherhood and the increased state control of religion and social life. In the 1970s and 1980s, the relative isolation of the suburbs allowed for the constitution and mobilization of vast activist networks. Religious activists politicized the suburban spaces where consumer debt and welfare benefits, boosted by the oil boom of the 1970s, had fostered political apathy. Islamists found followers through their powerful critique of the religious establishment (the senior Saudi 'ulama') and the country's military and economic alliance with the United States. Scholarship on Saudi religious movements typically focuses on ideology and rarely mentions the impact of US imperial policies on state building and space making. Graveyard of Clerics contests these well-trod narratives, which (1) fail to explain the emergence and resilience of vast political networks in highly repressive environments, (2) overlook the anti-imperialist undertone of religious protests, and (3) focus on elites while being oblivious of the vast majority of everyday activists. Combining interviews, archival research, analysis of

secondary sources, and extensive field research, Graveyard of Clerics contends that activists use the spatial resources offered by urban sprawl to organize and protest. Taking Riyadh as a case study, Menoret analyzes what happens to Islamic activists when they hail from a wealthy, religious society. In the suburbs of Riyadh, religious activism is not primarily an expression of socioeconomic frustration. It most often represents conservative, homeowner-based politics in an environment that Islamic activists view as both questionable and promising. The book thus contributes to three bodies of literature: the study of global suburbs, the study of religion in Saudi Arabia, and the study of political activism in suburban spaces"--

even female genies. Some genies live on the dark side. Others can be benevolent. Some can fly around and relocate at will. Others are born in a location and there they stay, until circumstances cause them to be moved, either by a decree by a more powerful force, or by being transported in a container to a new location. Our Genie, Hamza of Baghdad, falls into the benevolent category. He is not a flying genie, and has not as yet discovered all of his giftings and powers. We meet him at the beginning of his journey, when he is still relatively young, and seemingly not too bright. One has to wonder how many disasters it will take for him to wise up.
