Arab Republic of Egypt - International Monetary Fund. Middle East and Central Asia Dept. 2017-09-26 The 
launch of Egypt's reform program was a reversal from past policies, which had led to a buildup of large external 
and fiscal imbalances. With the liberalization of the foreign exchange (FX) market, the parallel market was
eliminated and FX shortages virtually disappeared. The ongoing fuel subsidy reform, wage restraint, and significant revenue gains from the new value-added tax (VAT) underpin fiscal consolidation, which is critical for debt sustainability. Structural reforms to revive growth and employment are progressing well. The reform program received strong approval from the business community, international development partners and foreign investors.

Malawi: International Monetary Fund. African Dept. 2018-11-30 Malawi’s economic growth remains moderate, reflecting a weak agricultural harvest and continued electricity shortages. Fiscal deficits continue to be financed domestically, as donor funding remains constrained by governance concerns since the 2013 cashgate scandal, resulting in an increasing public debt burden. Presidential elections are scheduled for mid-2019. Program performance. Most quantitative performance criteria (QPCs) were met at end-June 2018, with significant overperformance on international reserves and the reduction in Reserve Bank of Malawi (RBM) holdings of government securities. The QPC on the primary fiscal balance was missed by 0.9 percent of GDP due to expenditure overruns. The continuous QPC on new non-concessional external debt was missed due to a technical oversight in the Technical Memorandum of Understanding. Based on corrective measures, the authorities request waivers of non-observance. Two structural benchmarks were observed and most of the rest have been completed with delay.

The Report: Egypt 2018- Egypt has enjoyed a period of political stability since the turbulence of 2011-13, implementing a wide-ranging programme of economic reform. The process started with a drive to rebalance the economy through a number of challenging initiatives, including the reduction of subsidies, the introduction of value-added tax and the liberation of the Egyptian pound. At the outset of 2018, these headline measures had been implemented, and the government’s focus has since shifted to the improvement of governance and the investment climate. This effort includes the promulgation of the Civil Service Reform Law, aimed at cutting the large public sector wage bill, and an array of legislation designed to remove investment barriers, such as the Industrial Licensing Law, the Investment Law and the Company Law.

Office for Budget Responsibility: Economic and Fiscal Outlook - Cm. 8748-Office for Budget Responsibility 2013-12-05 The Office for Budget Responsibility reports that the UK economy has picked up more strongly in 2013 than expected in its March forecast. Private consumption and housing investment have grown whilst business investment and net trade continue to disappoint. The forecast for GDP growth in 2013 is revised up to 1.4 per cent, but this is not expected to be maintained in 2014 as productivity and real earnings growth remain weak. The positive growth is judged to be cyclical, reducing the amount of spare capacity in the economy, rather than indicating stronger underlying growth potential. Productivity-driven growth in real earnings is necessary to sustain the recovery and the outlook for productivity growth is the key uncertainty. Nevertheless, the forecast for growth in 2014 is now 2.4 per cent. Public sector net borrowing (PSNB) - the gap between what the Government spends and raises in revenue - is forecast to be £111.2 billion this year, £8.6 billion lower than the March forecast and £3.8 billion lower than in 2012-13. Underlying PSNB is estimated to have fallen by a third between 2009-10 and 2012-13, the pace of reduction slowing in 2012-13. The employment forecast is now expected to reach 31.2 million in 2018, with unemployment falling steadily over the coming years, reaching 7 per cent in mid-2015 and 6 per cent by the end of 2017. CPI inflation is forecast to fall back to the Bank of England’s 2 per cent target during 2016 whilst house price inflation is revised upwards, expected to be above 5 per cent in 2014 and 7 per cent in 2015.

Hong Kong SAR's economy benefitted from a strong cyclical upswing through the first half of 2018, supported by the continued global recovery, buoyant domestic sentiment, and the booming property market. However, near-term risks have significantly increased - including those from trade tensions, tighter global financial conditions, and capital outflows from emerging markets. Also, long-term challenges, including those in aging, elevated inequality, and the persistent housing shortage, need to be tackled. Prudent macroeconomic policies and ample buffers are in place to help smoothen the transition and ensure continued stability.

Property Asset Management

Douglas Scarlett 2018-05-01

Property asset management requires both day-to-day oversight of rental properties and an ability to maximize the potential of the portfolio through forward thinking and practical planning. Successful property managers must be flexible and proactive whilst maintaining a robust knowledge of technical, financial, and legal aspects of the leasing system. Property Asset Management is a practical guide to the key principles of successful property management, perfect for both student and practitioner.

Economic and Fiscal Outlook March 2013-Office for Budget Responsibility 2013-03-20 This report sets out forecasts for the period to 2017-18 and assesses whether the Government is on course to meet its medium-term fiscal objectives. The economy grew slightly more strongly in 2012 than expected but also shrank more than expected in the final quarter, and entered 2013 with reduced momentum. This leads the OBR to revise growth forecasts to 0.6 per cent in 2013 and 1.8 per cent in 2014. Thereafter the forecasts are unchanged rising to 2.8 per cent by 2017. The pace of recovery is constrained by slow growth in productivity and real incomes, continued problems in the financial system, the fiscal consolidation and the outlook for the global economy. Public sector net borrowing (PSNB) is expected to be broadly flat this and next, then will resume its fall in 2014-15. Underlying deficits in PSNB are forecast to be very close to £120 billion in 2011-12, 2012-13 and 2013-14. Tax receipts are £5.1 billion lower but central government departments are expected to underspend by almost £11 billion this year. The Government has a more than 50 per cent chance of meeting its fiscal mandate. Other forecasts by the OBR include: the ILO unemployment rate to peak at 8.0 per cent in 2014 before falling back to 6.9 per cent in 2017. The unemployment rate is expected to be negative in 2013, only marginally positive in 2014 before picking up to 2 per cent in 2016. The publication contains: Chapter 1: Executive summary; Chapter 2: Developments since the December 2012 forecast; Chapter 3: Economic outlook; Chapter 4: Fiscal outlook; Chapter 5: Performance against the Government’s fiscal targets; Annex A - Budget 2013 policy measures.

2016 Annual Competitiveness And Growth Slowdown Analysis For Sub-national Economies Of India-Tan Khee Giap 2017-11-21 This book undertakes rigorous empirical research on competitiveness of the sub-national economies of India. One of the cornerstones of Asia Competitiveness Institute (ACI)'s research strategies is to factor in the diversity of sub-national economies in a large and diverse country like India and undertake rigorous research that will inform policymakers in these economies. ACI's competitiveness framework computes rankings for all the sub-national economies of India by accounting for a plethora of socio-economic development indicators that determine competitiveness. Into its fourth edition, this book entitled 2016 Annual Competitiveness and Growth Slowdown Analysis for Sub-National Economies of India presents our annual update of competitiveness analysis of India’s sub-national economies. ACI's competitiveness analysis employs 75 different indicators across four different environments to capture the dynamics of competitiveness in a holistic way at the sub-national level. The book also has a What-if competitiveness simulation exercise to identify the specific policy areas that each sub-national economy must focus on to improve its rankings. Further to an analysis of competitiveness, the book delves deeper into understanding the dynamics of economic growth of the various sub-national economies in India, which is a significant value-addition to the related literature as the book has a comprehensive and dedicated discussion on the prospects of and determinants of growth slowdown at the sub-national level.
