Steel Structures—N. Subramanian 2011-02-03 Design of Steel Structures is designed to meet the requirements of undergraduate students of civil and structural engineering. This book will also prove useful for postgraduate students and serve as an invaluable reference for practicing engineers unfamiliar with the limit state design of steel structures. The book provides an extensive coverage of the design of steel structures in accordance with the latest code of practice for general construction in steel (IS 800 : 2007). The book is based on the modern limit state approach to design and covers topics such as properties of steel, types of steel structures, important areas of structural steel technology, bolted connections, welded connections, design of trusses, design of plate girders, and design of beam columns. Each chapter features solved examples, review questions, and practice problems as well as ample illustrations to supplement the text.

Tintinalli’s Emergency Medicine—Judith E. Tintinalli 2011-01-01 With 418 contributors representing over 120 medical centers from around the world, this book comprehensively covers the entire field of emergency medicine—from prehospital care, disaster preparedness, and basic resuscitative techniques—to all the major diseases and disorders encountered in the emergency department. Unquestionably the leading text in the field, this is a true must-have reference for everyone in emergency medicine from residents to practicing physicians. The Seventh Edition is highlighted by a new full-color presentation, a companion DVD with 17 additional chapters, a greater international focus, and innovative new features and content.

Principles and Practice of Pediatric Oncology—Philip A. Pizzo 2011 Thoroughly updated for its Sixth Edition, Principles and Practice of Pediatric Oncology provides a comprehensive review of the multiple disciplines that make up the care and research agenda for children with cancer. It is the most comprehensive textbook of pediatric oncology ever put together, covering biology and genetics and detailing the diagnosis, multimodal treatment, and long-term management of patients with cancer. The fundamental principles of supportive care and the psychosocial aspects of support for patients and families are also discussed.
