**Special Needs Education** South Africa. Department of Education 2001

**Internal Auditing Theory** G. A. Swanson 1991-01-01 This analytical study examines the function of internal auditing from the viewpoint of its role within organizations and within the economics of societies and governments. Swanson and Marsh place internal auditing in the context of the scientific conceptual framework of Living Systems Theory, and thus provide a basis for a systematic theoretical framework and a theory based on observable, measurable entities. They identify the advantages of using this system to advance the knowledge and understanding of organizations, and also propose a higher level of internal audit functions that can advance modern societies.

**Teachers Discovering Computers** Gary B. Shelly 2003-10-01 With World Wide Web integration and interactivity, extraordinary visual drawings and photographs, unprecedented currency, and unique lecture presentation materials, this book will make your introductory computer course for teachers exciting and dynamic! an experience your students will remember as a highlight of their educational careers!

**Consumer Behaviour** Robert East 2008-05-19 ‘A wonderful (and very unusual) balance between areas of marketing that are often at odds with each other (or, worse yet, unaware of each other)… I recommend it to any student, researcher, or manager in marketing’ Peter Fader, Frances and Pei-Yuan Chia Professor; and Professor of Marketing, Wharton School, University of Pennsylvania ‘Exceptional for the amount of relevant research that is presented and explained. Students who have read and understood this text are likely to be much more of use to industry’ Fergus Hampton, Managing Director, Millward Brown Precis Written in a focused and accessible form by respected marketing academics, Consumer Behaviour helps readers to develop analytical and evidence-based thinking in marketing and avoid more formulaic approaches that lack the support of research. With a strong focus on the use of research, this book will really appeal to the specific needs of higher-level students. The book covers important material that is often missing in consumer behaviour texts. For example, whole chapters are devoted to brand loyalty, brand equity, biases in decision-making, word of mouth, the response to price and the effect of advertising. Shorter reviews cover evidence on topics such as loyalty programmes, the response to delay and retail atmospherics. Chapters are quite short and divided into sections. Each chapter contains exercises designed to draw out key ideas and consolidate understanding, and there are suggestions for further reading. A website to support the book has an Instructor’s Manual that offers PowerPoint slides, discussion of exercises, computer programs, a suggested Masters-level course, and a Word file of references to assist students writing assignments.

**Disability in Context** Obert Maguvhe 2015 This brand new book addresses disability issues, including inclusive education, advocacy and empowerment. Aimed specifically at students studying in South Africa, this book attempts to plug the gap between policy, services and rights for disabled people in South Africa, whilst also helping readers to find a new world view. This book is suitable for both first year undergraduates in inclusive education and senior students and also academics looking to advance theory and lay good foundations for comprehensive, evidence-based practice.

**Corporate Citizenship** Alfred Bimha 2017-01-15 Corporate citizenship is a prominent international issue as contemporary corporations are no longer expected to perform financially, but are also expected to have an ethical relationship of responsibility between the corporate itself and the society in which it operates and performs its business activities. Provides an up-to-date theoretical content pertaining to corporate citizenship, providing local and global examples and case studies.

**The Dream House** Craig Higginson 2016-04 A farmhouse is being reproduced a dozen times, with slight variations, throughout a valley. Three small graves have been dug in the front garden, the middle one lying empty. A woman in a wheelchair sorts through boxes while her husband clammers around the old demolished buildings, wondering where the animals have gone. A young woman – called ‘the barren one’ behind her back - dreams of love, while an ageing headmaster contemplates the end of his life. At the entrance to the long dirt driveway, a car appears and pauses - pointed towards the house like a silver bullet, ticking with heat. So begins The Dream House, Craig Higginson’s riveting and unforgettable novel set in the Midlands of KwaZulu-Natal. Written with dark wit, a stark poetic style and extraordinary tenderness, this is a story about the state of a nation and a deep meditation on memory, ageing, meaning, family, love and loss. This updated 2016 edition contains new content, with Craig Higginson exploring the background to The Dream House, his varied experiences in a farmhouse in KwaZulu-Natal and the subsequent and poignant motivations for this moving novel.

**Consumer Behaviour** Sanjana Brijball Parumarue 2012-01-01 Consumer behaviour has an increasing impact on business decisions through various individual and environmental factors. This phenomenon can be observed through the different buying patterns of generations and cultures when acquiring products and services. The study of consumer behaviour provides insight into consumer information processing, decision making and consumption patterns and is, therefore, critical to marketing planning and strategies, public policy and ethics. This fascinating subject also helps us understand our own consumer patterns: when, why and where we buy certain items, why we use them in certain ways, and how we dispose of them. Consumer behaviour is an essential component of both marketing and industrial psychology courses.

**Global Business Management** Abel Adekola 2016-04-22 This book interweaves the concepts of the guidance on globalization, international management, and the intricacies of international business that many books on the market treat independently. It clarifies and explains culture, cultural misunderstandings, and cross-cultural interactions. Adekola and Seroq’s text is unique in that it offers both the management perspective and the cultural perspective. It is for managers seeking to thrive in the global economy. This book focuses on managing global organizations, providing a basis for understanding the influence of culture on international management, and the key roles that international managers play. It clearly shows how to develop the cross-cultural expertise essential to succeed in a world of rapid and profound economic, political and cultural changes.

Introduction to Law for Paralegals-Katherine A. Currier 2001

Handbook of the Sociology of Education in the 21st Century-Barbara Schneider 2018-10-10 This handbook unifies access and opportunity, two key concepts of sociology of education, throughout its 25 chapters. It explores today’s populations rarely noticed, such as undocumented students, first generation college students, and LGBTQs; and emphasizing the intersectionality of gender, race, ethnicity and social class. Sociologists often center their work on the sources and consequences of inequality. This handbook, while reviewing many of these explanations, takes a different approach, concentrating instead on what needs to be accomplished to reduce inequality. A special section is devoted to new methodological work for studying social systems, including network analyses and school and teacher effects. Additionally, the book explores the changing landscape of higher education institutions, their respective populations, and how labor market opportunities are enhanced or impeded by differing postsecondary education pathways. Written by leading sociologists and rising stars in the field, each of the chapters is embedded in theory, but contemporary and futuristic in its implications. This Handbook serves as a blueprint for identifying new work for sociologists of education and other scholars and policymakers trying to understand many of the problems of inequality in education and what is needed to address them.

Principles of Evidence-Pamela-Jane Schwikkard 2009 This third edition, like the first and second, strikes a balance between the theory of the law of evidence and its practical application in a constitutional issues, the impact of these sections on the Anglo-South African law of evidence, and the extent to which some of them may be subject to constitutional challenges. Stock is also taken of the provisions of the Electronic Communications and Transactions Act 25 of 2002 and the consequences of the repeal of s 66 of the Internal Security Act 74 of 1982.

Education in a New South Africa-Robert Balfour 2015-09-30 This collection presents new investigations into the role of heritage languages and the correlation between culture and language from a pedagogic and cosmopolitical point of view.

Practising Strategy-Tersia Botha 2019 “Given the common acknowledgement that strategy implementation is the greatest challenge to managers in the 21st century and the greatest reason for strategy failure we decided to focus on strategy implementation. Rather than promoting the unrealistic idea of strategy as a purely rational and deliberate outcome, this book acknowledges and explores the idea that strategy is often emergent, messy and experimental and features a number of new chapters, focusing on strategy implementation and change management, resource allocation and responsible leadership. It also includes a more detailed coverage of managing strategic risk.”--Publisher’s description.

INTRODUCTION TO LEGAL PLURALISM IN SOUTH AFRICA-RAUTENBACH.

Challenges and Issues facing the Education System in South Africa-Legotlo, Marekwa Wilfred 2014-05-05 The quality of education is pivotal for the production of human capital and this cannot be compromised by failing to focus on the quality of education offered in schools. The inputs in the system such as trained and motivated teachers, buildings and classrooms including sanitation, clean water, instructional material such as textbooks, as well as strong leadership with vision to steer the winds of change are important in providing the desired outcomes. The chapters in this volume are broadly divided into three subsections as follows: learner related issues, (farm and rural schools, poverty and schooling, school violence, and students rights); teacher related issues (teacher morale and motivation, teachers for all schools, management needs of school principals); and administrative/policy related issues (inclusive education, and school community relations). The social demand for better schools, effective principals, qualified and committed teachers and better opportunities for all place a huge challenge to provinces and the state to protect the rights of all citizens. This volume sets out the challenges facing the education system in South Africa, such as poor school infrastructure, poor learning conditions, and a lack of learning materials and provides recommendations on how some of these can be overcome.

The Economy-Core Team 2017-09-21 The only introductory economics text to equip students to address today’s pressing problems by mastering the conceptual and quantitative tools of contemporary economics. OUP has partnered with the international collaborative project of CORE researchers and teachers to bring students a book and learning system that complements and enhances CORE’s open-access online e-book. The Economy is a new approach that integrates recent developments in economics including contract theory, strategic interaction, behavioural economics and financial instability. It challenges students to address inequality, climate change, economic instability, wealth creation and innovation and other problems. It has been adopted as the standard principles course at University College London, Sciences Po Paris and the Toulouse School of Economics. A new economics for the principles course The Economy begins with social interactions using elementary game theory and institutions modelled as rules of the game. This provides the basis for a modern treatment of markets including price-making as well as price-taking, the exercise of power, and the importance of social norms and adjustment disequilibria. Introducing labour and credit markets with incomplete contracts allows a consistent treatment of aggregate employment and fluctuations without the need for ad hoc sticky price and wage assumptions. Banks create money by extending credit and a central bank seeks to implement a target inflation rate. Growth and stability are illustrated from the Great Depression, through the post-war golden age of capitalism through to the financial crisis and ensuing uncertainties. Students acquire an understanding of the past and current evolution of the economy in its social and environmental context, equipping them to marshal evidence and articulate positions about contemporary policy issues.
